

Farm Science Review

Herrick Archives Building S 85/90

This report supplements two earlier reports: S 21/25 and S 69/75. It reports changes in permanent buildings for the 1976 and 1977 Farm Science Review. It should be understood that "permanent" buildings owned by exhibitors are permanent only in the sense that they are left in place from year to year. They are, however, subject to removal or relocation at any time.

The map below in this report is a copy of a map used by exhibitors and Farm Science Review personnel. It shows lot numbers and informal street names. It is not to scale. Sawmill Road is not shown, but would be just off the west margin of the map. The "Field Headquarters" building at the right is Building S 26. (See Appendix A for identification.)

Data on new buildings for the 1976 and 1977 Farm Science Reviews are as follows:

S 85 - Lots I and J. New in 1976. A 30' x 40' structure erected and owned by Edward P. Rebovick Co.

Photograph X22839.

See Addendum No. 1

S 86 - Lots 218 and 219. New in 1977. Replaced buildings S 21 and S 73. A 36' x 72' structure erected and owned by Umbaugh Pole Building Co. Photograph X22838.

See Addendum No. 5

S 87 - Lot 355. New in 1976. A 40' x 66" structure erected and owned by Seven Limers, Inc. Photograph X22837.

See Addenda Nos. 2 & 5

S 88 - Just north of Case Road and south of Lot 356. In "Crop Drying Area." New in 1977. See A grain leg and holding bin erected by the Clayton and Lambert Co. Owned by Ohio State University. Photographs X22041 and X22842.

See Addenda Nos. 2 & 5

S 89 - A group of five circular grain storage bins just north of S 88. Erected in 1976. Owned by Ohio State University. Photographs X 22843, X 22844, and X 22845.

See Addenda No. 5

S 90 - Lot 150. New in 1976. A silo erected and owned by the N.W. Ohio Silo Co. Photograph X 22847.

John H. Herrick

September 28, 1977

ADDENDUM NO. 1

Building S 85 is soon to be demolished because the owner (Rebovich Co.) is in bankruptcy.
John H. Herrick March 14, 1979

See Addendum No. 3

ADDENDUM NO. 2

For the 1979 Farm Science Review, a second grain leg and holding bin were erected by the Clayton and Lambert Co. They are owned by Ohio State University and are located directly west of S 88.

The new grain leg and holding bin is designated Building S 38.
For photograph, see X 25026.

The Seven Limers Building (S 87) was removed before the 1979 Farm Science Review.

John H. Herrick

October 22, 1979

ADDENDUM NO. 3

Chief Industries had a garage building, feed mixer, and bin on Lot 63 for the 1979 Farm Science Review. They have now decided to leave them in place.

See Addendum No. 6

These buildings are designated S 47. For photographs, see X 25033 and X 25034.

The University has purchased the Rebovich building (S 85) for \$200, and is now attempting to sell it to a buyer who would remove it from University property. It appears probable that the sale will be made.

In event the building is not sold, it is anticipated that it will be demolished, and possibly re-erected near the Tuller barn (989).

John H. Herrick December 31, 1979

See Addendum No. 4

ADDENDUM NO. 4

The Rebovich Building (S 85) was sold and was removed from the University grounds by early June of 1980.

John H. Herrick

July 10, 1980

ADDENDUM NO. 5

1. The Seven Liners Building (S 87) was removed after, not before, the 1979 Farm Science Review. It was replaced in 1980 by S 105 on the same site.

2. Building S 86 was replaced in the summer of 1980 by Building S 104 on the same site.

3. The grain holding bins (S 38, S 88, and S 89) are shown on a map in Report S 103/6.

John H. Herrick

November 19, 1980

ADDENDUM NO. 6

Immediately after the 1981 Farm Science Review, Building S 47 (Chief) was removed, because it was in the clearzone required to be kept free of buildings for the safety of aircraft using Don Scott field.

John H. Herrick
